[(Diagnosis and Management of Tubo-Uterine Factors in Infertility)] [Edited by R. F. Harrison] published on (April, 2012) R. F. Harrison

This is the second compilation of papers given during the Related Communications Sessions of the XIth International Federation of Fertility Societies World Congress held on June 26th-July 1st 1983 at the Royal Dublin Society, Dublin, Ireland. Except for Part I, where results of animal experimentations are gathered together, the volume is concerned solely with studies in the human. The role of infection and endometriosis in the aetiology and treatment of the tubo-uteroperitoneal factor in infertility are the concern of Parts II and III. Diagnostic and therapeutic aspects of tubal disease are covered in Parts IV and V and the book ends with Part VI, chapters on the uterus and vagina. Laparoscopy and microsurgical techniques have undoubtedly transformed the diagnostic and therapeutic outlook in this area of infertility. This book shows you how far such techniques have progressed and how much there is yet to do. Dublin, 1983
